Hi Marion

Thanks for making contact and it is good to get the community feedback so that we can address.

Donaldsons have provided a summary of their current work activities below. In the last couple of days they have been completing pipe testing and disinfection. While this is happening it looks like there is not a lot happening, but this work is essential before the final piece of pipe is inserted and the new main is made live. This step ensures that there are no leaks in the new pipes and that the pipe is safe for conveyance of drinking water.

Let me know if anyone would like to discuss further.

It is understood that the traffic lights are an inconvenience and we are very close to finishing. Thanks to everyone for their patience while we do the final pieces of work!

Kind regards

Rob

Hi Rob,

108 Aranui Rd Worksite:

A short section of new water and wastewater pipe was left out to meet pressure testing and livening requirements. This allowed the water and wastewater pipes to be tested and livened from the Community Centre to [108 Aranui Rd](#), now from [108 Aranui Rd](#) to the Mapua Dr intersection.

Now that the pipes are almost ready to be livened from [108 Aranui Rd](#) to the Mapua Dr intersection, we have excavated to connect the missing link. This excavation will be filled in after all testing and connection has taken place which is planned by 7th May.

Mapua Dr Worksite:

Work has appeared slow due to working around existing live pressure wastewater and water pipes, Pressure testing, chlorinating, flushing and bacto testing. On Thursday 22nd April (tomorrow) the watermain will be connected to the existing network. This affects only a handful of properties that have already been letter dropped. This is the last section to allow the new pipe to feed water from the Mapua Wharf to Pinehill Rd.

After the water connection takes place we will finish laying the wastewater pipe in this location and liven it up.

Two lane access is expected at the Intersection in approximately 3 weeks.

Going forward:

The following is the main works in the coming weeks:

- Private property water laterals will be cut over along Aranui Rd between [108 Aranui Rd](#) & [Stafford Dr](#),
- Wastewater main road crossing at [72 Stafford Dr](#),
- Water Rider Main works from Tait Street to [66 Stafford Dr](#),
- Excavation and removal of temporary connections one at Warren Pl and one near the Community Centre.

Any questions, let me know.

Cheers,

Vaughan Scott | Contracts Manager

Hi Vaughan

Can you give me an update?

Thanks

Rob

Subject: Aranui Road water and wastewater works

Good morning Rob,

Can you please give MDCA an update to what is currently occurring or not occurring at the two locations on Aranui Road where the road has been dug up and left open.

It appears work has stopped at both these locations and because of this residents are asking questions with some frustration creeping in.

MDCA are also aware that the prolonged worked near Mapua School is having a huge financial impact on our local fruit and veggie store next door to the road works. The one way traffic light system that is in place, makes negotiating this intersection slow.

I would appreciate it if you could include in your update when this work is likely to be completed.

Kind Regards

Marion Satherley

MDCA Chair
