Thanks Wayne.

Happy to share these links but on the condition that we make it clear via a disclaimer statement that we are doing so in the interest of keeping our members informed - and that MDCA's position is neither for nor against the Dam.

Regards,  
Paul.

Hi Guys,

I'm not sure if you have heard of Murray Dawson but he has put out 3 interesting videos on the Lee Valley Dam. He is a mathematician and I met him about 50 years ago and know that he is very thorough and measured. He has been opposed to the Dam from the beginning because he believes that the reasons for building a large dam are flawed. This email will give you a link to the 3 videos and it is best to start at the beginning.

He has asked that the links be sent to as many people as possible and I thought that putting them on our FB might provide people with useful information, especially with the elections coming up. \_ Your decision though

Cheers  
wayne

Subject: Dam video #3

To: Murray Dawson <waterinfont@gmail.com>

Hi All

Below is a link to my last video on the dam. It can also be found by opening You tube then searching 'waimea dam presentation 3'.

As usual please forward to as many as possible as soon as possible.

regards

Murray Dawson
