

## ✓ SAFER CROSSING POINTS

## ✓ WIDER FOOTPATHS FOR ALL USERS

## ✓ ENCOURAGING SLOWER SPEEDS

The Aranui Road Streets for People pilot project is a step towards a future where it is easier, safer and healthier to live, work, learn and play in Māpua.

Our focus is on providing greater choices for people about how they get around the village by improving safety for all users. We're doing this by piloting quick, low cost, semi-permanent improvements. These will be installed, then modified following feedback. This will inform more permanent improvements down the line.

Our survey of residents received 218 replies with many people voicing concerns about pedestrian safety, especially for children crossing Aranui Road. People want to see designated crossings, safer vehicle speeds and less congested footpaths.
