Tena kotou

The on going evolution of the Mapua Masterplan remains a topic of significant interest within the MDCA. Recent discussion has highlighted a desire for a group engagement with the TDC in this next phase of consultation. While the planned drop-in consultation process will produce an output from one to one engagement, there remains a need for a facilitated group session.

A decision making participation with the community would be the most desirable process, however the planned informative participation process could be enhanced by a facilitated group meeting with the Mapua Community..

Could you please consider this proposal?
